Expanded Map

- Pins & clusters represent first page of results
- Filters update result set, and modified set will be replotted and rezoomed
- Panning does not update plotted hotels, nor filters
- Mini-map in lower right pans map view and clicking on it zooms map out to market view

Given it's geographic nature, the use of this filter is guaranteed to re-zoom the map. If a user selects "Wrigleyville" the results should update to only include hotels in Wrigleyville and the map should rezoom and replot on those 20 (or less) results only.

Toggles between supported views
(What views to we want? What views com with the API?)

QUESTION
Can this be moved to the bottom
of the page, like in labs?
Was that acceptable platform-
wise?
